Board President Guarienti called the regularly scheduled Board meeting to order at 5:01 P.M.

Trustees Guarienti, Dickinson, Beatty, Poulson, Donahue, Young, Marquez, Doggett, Hentschke, Washburn, and Quinn were present; Trustees Narum, Izquierdo, and Reed were absent.

Board President Guarienti invited members of the public to speak on any issue relevant to the District. Trustee Marquez introduced her guest, Ms. Asia Denman, from the Alameda County District Attorney's Justice Academy.

The board approved the minutes of the 1034<sup>rd</sup> meeting held June 8<sup>th</sup>, 2016; (Trustees Quinn, Doggett) --unanimous, Trustees Guarienti, Dickinson, Beatty, Quinn --abstained.

The board approved resolution 1035-1 ordering the levy of assessments for fiscal year 2016-17 for the Alameda County Mosquito Abatement District Mosquito and Disease Control Assessment. Trustee Quinn asked for a reminder on the amount of the levy, Trustee Dickinson stated the amount, found in the resolution (\$2.50) and also asked for that amount's justification. The District Manager explained that justification is found in the Engineering Report. (Washburn, Doggett)– unanimous

After a review of bids on a new pesticide storage shed by the District Manager, Trustee Quinn asked when the structure was built (early 1980s). Trustee Washburn provided justification for the rebuild based on odor. Trustee Young asked about the lighting, Board President Guarienti asked about the ventilation, and Trustee Dickinson asked if this item was budgeted. The District Manager answered that the lighting will be upgraded, the ventilation details are forthcoming, but a priority, and the project was budgeted. After Trustee Beatty stated that he found adequate justification (after asking for the location of the shed) and made a motion to approve, seconded by Trustee Washburn, the board awarded the contract for the construction of a new pesticide storage shed to Donato Builders (Beatty, Washburn)– unanimous

Trustees discussed the possibility of cancelling or rescheduling the October 12<sup>th</sup> board meeting. Trustee Washburn asked if substitute staff can be used (possibly, but with additional training), Trustee Dickinson stated that if the meeting is not required, it should be cancelled. Trustee Quinn questioned if it is possible to cancel a meeting (yes, as long as noticed 72 hours prior). Trustee Beatty asked if an action is not given today, will the District Manager be able to make travel arrangements (yes, as the meeting will either be cancelled, rescheduled, or with a designee manager). Board President Guarienti suggested that this item be placed back on the agenda in September as an action item.

After a presentation and recommendation by the District Manager, the board awarded the contract audit services to Maze & Associates (Doggett, Marquez)– unanimous

Board President Guarienti provided an explanation and the implementation of the proposed policy updates and first readings of policies 100, 200, 300, 400, 800 with assistance by the District Manager. He mentioned that these were reviewed by himself, and Trustees Doggett and Marquez of the Policy Committee. He also thanked the dedication and input provided by the committee members. Trustee Dickinson asked how this information is given and absorbed to staff, or, who reads it? The District Manager responded that though there are no exams given on these policies, they were just reviewed by all staff and will be distributed and discussed, especially by supervisors, regularly at staff meetings. Trustees Marquez and Washburn asked if further edits are possible via email before the 2<sup>nd</sup> reading in August (yes).

The Board reviewed warrants dated June 15, 2016 numbering 061316 through 063816 amounting to \$309,955.97 and warrants dated June 30, 2016 numbering 063916 through 067216 amounting to \$151,595.92. Trustee Guarienti asked about a warrant for payment to Mr. Mello. The District Manager explained that this payment is for a retiree who was grandfathered into the old district plan of a capped (\$1,200, now \$1,500) reimbursement for dental work, rather than being enrolled into a district dental plan. He is one of two retirees who are still in this arrangement.

The Board reviewed the budget summary received as of June 30<sup>th</sup>, 2016.

The District Manager presented the Monthly Staff Report for June 2016. Trustee Dickinson asked if the response time for West Nile activity in birds is because of new lab capabilities. The District Manager and Trustee Washburn explained that the District has had the RAMP test for several years (2003) for detecting virus in birds, the new lab capabilities are in detection of viruses in mosquitoes. Trustee Dickinson suggested that the District should promote its improved laboratory capabilities.

During the Manager's report for June 2016, Trustee Beatty asked if there are invasive *Aedes* in northern California. The District Manager explained that they have been found in

San Mateo County, and also two adults were discovered at the District's facility in 2015—which were confirmed to have been accidentally released from the lab but not found since. Trustee Washburn offered that these laboratory-reared species most likely did not survive the natural environment. Trustee Young asked, answered by Trustee Hentschke, where the first positive West Nile virus bird was found (Central Avenue in Fremont). Board President Guarienti mentioned he attended a talk at the Dublin Library on Brazil, Rio de Janeiro, and the issues the country is facing with the upcoming Olympics (including the Zika virus). He also asked the District Manager to remind the cities of Alameda County to review the District's Biennial Report during the upcoming presentations. Trustee Marquez asked for more green (abandoned) swimming pool information to be included in forthcoming reports.

Board President Guarienti asked for reports on conferences and seminars attended by Trustees. Trustee Washburn thanked District staff, Field Operations Supervisor Joseph Huston and Lab Director Dr. Eric Haas-Stapleton, for their participation in the Bug Day at the UC Berkeley Botanical Garden.

Board President Guarienti asked for announcement from the Board, there were none.

Board President Guarienti asked trustees for items to be added to the agenda for the August Board meeting, there were none.

The meeting adjourned at 6:01 P.M.

meetings of the Board. Health and Safety Code 2030.

**§105.8** The District Manager's monthly report shall be presented at the Board meeting (of the following month).

**§105.9** The District's Biennial Report shall be made on a fiscal year basis.

**§106. Conflict of Interest**

**§106.1** State laws are in place to control action by a Board member which may result in a conflict of interest. The purpose of such laws and regulations is to ensure that all actions by the Board are taken in the public interest. State conflict law is complex; consultation with legal counsel is encouraged.

**§106.2** At any point a Board member believes there is a potential for a conflict of interest between action he or she may take as a Trustee of the District and his or her personal interest, he/she is encouraged to consult with the Attorney for the District or private legal counsel for advice.

**§106.3** While not inclusive, a general summary of Conflict of Interest rules is provided below.

- a) In general terms, the Political Reform Act prohibits a public official from having a financial interest in a decision before the official; Government Code §1090 prohibits a public official from having a financial interest in government contracts.
  - b) The Political Reform Act prohibits public officials from making, participating in, or in any way attempting to use their official position to influence a governmental decision in which they know, or have reason to know, that they have a financial interest.
  - c) The public official has a financial interest if “it is reasonably foreseeable that the decision will have a material financial effect, distinguishable from the effect on the public generally...” on a financial interest of the official or a member of the official’s immediate family.
  - d) Determining whether a Board member has a financial interest is very complicated and fact specific. Financial interests include interests in
-

**CHAPTER 100 – POLICIES GOVERNING THE BOARD OF TRUSTEES  
ALAMEDA COUNTY MOSQUITO ABATEMENT DISTRICT**

leases, worth \$1,000 or more, and gifts of \$250 or more provided to or received within one year of the decision.

- e) Effective January 1, 2003, a Board member must take the following steps after he or she has determined that a conflict of interest exists under the Political Reform Act:
- 1) **Publicly identify the financial interest.** This must be done in enough detail for the public to understand the financial interest that creates the conflict of interest.
  - 2) **Recuse his or herself from both the discussion and the vote on the matter.** The Board member must recuse his or herself from all proceedings related to the matter.
  - 3) **Leave the room until the matter has been completed.** The matter is considered complete when there is no further discussion, vote or any other action.
- Exception: If the matter is on the consent calendar, the Board members does not have to leave the room.
- f) The Fair Political Practices Commission (FPPC) has published lengthy regulations and opinions on conflicts of interest that are useful in determining whether a particular financial interest or decision could give rise to disqualification based on a potential conflict of interest. The FPPC also puts out informational pamphlets to assist public officials in determining what types of situations may give rise to prohibited conflicts of interest.
- g) Government Code §1090 is similar to the Political Reform Act, but applies only to contracts in which a public official has a financial interest. The financial interests covered by §1090 are different from those in the Political Reform Act. Having an interest in a contract may preclude the Board from entering into the contract at all. In addition, the penalties for violating §1090 are severe. If a Board member believes that he or she may have any financial interest in a contract that will be before the Board, the member should immediately seek advice from the District's Attorney or the member's personal attorney.
- h) There are a number of other restrictions placed on Board actions such as prohibitions on secrecy and discrimination as well as assurance that all District funds are spent for public purposes.
- i) Violations of these restrictions may result in personal liability for individual Board members.
-

## Chapter 200. FINANCIAL POLICIES

District funds, equipment, supplies (including letterhead), titles and staff time must only be used for authorized District business. The following types of expenses generally constitute authorized expenses, as long as the other requirements of this policy are met:

### **§207.2 All other expenditures require approval by the District Board of Trustees.**

The following expenses specifically require Board approval if not included in the budget:

## Chapter 200. FINANCIAL POLICIES

- f) Personal losses incurred while on city/county/district business.

Any questions regarding the propriety of a particular type of expense should be resolved by the approving authority before the expense is incurred.

### **§207.4 Expense Report Content and Submission Deadline**

Expense reports must document that each expense claimed has met the requirements of the policy. For example, if the meeting is with a legislator, the local agency official should explain whose meals were purchased, what issues were discussed and how those relate to the District's adopted legislative positions and priorities. Trustees and employees must submit their expense reports within 30 days of an expense being incurred, accompanied by receipts documenting each expense. Restaurant receipts, in addition to any credit card receipts, are also part of the required documentation. Receipts for gratuities and tolls under \$5 are not required. Inability to provide such documentation in a timely fashion may result in the expense being borne by the individual.

### **§207.5 Reports to Governing Board**

At the following District Board meeting, each official shall provide a brief oral or written report on meetings or functions attended at District expense. If multiple District representatives attended, a joint report may be provided.

### **§207.6 Compliance with Laws**

District officials should keep in mind that some expenditures may be subject to reporting under the Political Reform Act and other laws. All agency expenditures are public records subject to disclosure under the Public Records Act.

### **§207.7 Violation of this Policy**

## **Chapter 200. FINANCIAL POLICIES**

Use of public resources or falsifying expense reports in violation of this policy may result in any or all of the following: 1) loss of reimbursement privileges, 2) demand for restitution to the District, 3) the District's reporting the expenses as Trustee or employee income to state and federal tax authorities, and 4) prosecution for misuse of public resources.

### **§208 Cost Control**

To conserve District resources and keep expenses within community standards for public officials, expenditures should adhere to the following guidelines.

#### **§208.1 Transportation**

District personnel are expected to use the most economical mode and class of transportation reasonably consistent with scheduling needs and cargo space requirements, using the most direct and time-efficient route. In the event that a more expensive transportation mode or route is used, the cost borne by the District will be limited to the cost of the most economical, direct, efficient and reasonable mode of transportation. District personnel are encouraged to use public transit when available and feasible and to carpool when several people are traveling to the same event by automobile. Automobile mileage is reimbursable at Internal Revenue Service prevailing rates in effect. These rates are designed to compensate the driver for gasoline, insurance, maintenance and other expenses associated with operating the vehicle. Parking, tolls and other similar expenses relating to travel by auto are reimbursable if necessarily incurred in connection with a meeting or function authorized under this policy.

#### **§208.2 Lodging**

Lodging costs will be reimbursed or paid for by the District when travel on official District business reasonably requires an overnight stay. If such lodging is in connection with a conference, lodging costs should not exceed any group rate published by the conference sponsor for the meeting in question. In any event, lodging expenses should be moderate, taking into account community standards and prevailing lodging costs for the area.

#### **§208.3 Meals**

Meal expenses and associated gratuities should be moderate, taking into account community standards and the prevailing restaurant costs of the area. A helpful source of guidance is Internal Revenue Service per diem rates for meals and incidental expenses, which include adjustments for higher cost locations. Alcohol/personal bar bills are not an appropriate use of District resources.

#### **§208.4 Telephone/Fax/Cellular**

Individuals will be reimbursed for actual telephone and fax expenses incurred on District business. Telephone bills should identify which calls were made on District business

## **Chapter 200. FINANCIAL POLICIES**

### **§208.5 Airport Parking**

Long-term parking should be used for travel exceeding 24 hours.

### **§208.6 Cash Advance Policy**

From time to time, it may be necessary for a District representative to request a cash advance to cover anticipated expenses while traveling or doing business on the District's behalf. Such request for an advance should be submitted to the District Manager at least 14 days prior to the need for the advance with the following information:

- a) The purpose of the expenditure(s);
- b) The benefits of such expenditure to the residents of District;
- c) The anticipated amount of the expenditure(s) (for example, actual or expected hotel rates, meal costs, and transportation expenses); and
- d) The dates of the expenditure(s).

Any unused advance must be returned to the District treasury within two business days of the official's return, along with an expense report and receipts documenting how the advance was used in compliance with this expense policy.

### **§208.7 Credit Card Use Policy**

The District does not issue credit cards to individual Trustees but does have credit cards for selected District expenses. Trustees may use the District's credit card for such purposes as airline tickets and hotel reservations by following the same procedures for cash advances. Receipts documenting expenses incurred on the District credit card and compliance with this policy must be submitted within five business days of use. District credit cards may not be used for personal expenses, even if the Trustee or employee subsequently reimburses the District. Purchasing agents have a credit card. Employees can purchase items approved in the budget. Receipts are given to the Office Assistant or Administrator. The receipts are reconciled to the statements and then recorded to the general ledger. Disbursement goes through the warrant process noted above

### **§208.8**

In the event circumstances should arise appearing to warrant deviation from these policies, the manager shall secure the approval of the Board before making any changes.

## **§209 Conference Policy**

### **§209.3. Mosquito and Vector Control Association of California Conference - Within the Bay Area.**

The manager may select any number of District personnel to attend such sessions as he or she may designate from which, in his or her opinion, the employees and the District would derive the most benefit.

Trustees are encouraged to represent the District at MVCAC seminars, workshops, committee meetings and regional meetings.

## **§210 Loss or Damage to Personal Property**

The District will not be responsible for loss or damage to personal items when the loss or damage incurred was not work related. Each occurrence of loss or damage to employee's personal property will be reviewed by the Board on a case-by-case basis.

## **§211 Policy for Disposition of Fixed Assets**

### **§211.1**

A fixed asset is defined as an item with a purchase price or current value of \$50 or greater and an expected useful life of three years or greater. ### **§211.2**

Disposition of fixed assets may be initiated by a purchasing agent. A disposal form must be completed by the initiator and approved by the manager and Board, consistent with District policy, before the item is disposed of, salvaged or sold. ### **§213 Fraud Policy**

#### **§213.1**

District Management is responsible for the detection and prevention of fraud, misappropriations, and other irregularities. Fraud is defined as the intentional, false representation or concealment of a material fact for the purpose of inducing another to act upon it to his or her injury. Each member of the management team will be familiar with the types of improprieties that might occur within his or her area of responsibility and be alert for any indication of irregularity. Decisions to prosecute or refer the investigation results to the appropriate law enforcement and/or regulatory agencies for independent investigation will be made in conjunction with legal counsel and senior management, as will final dispositions of the case.

(See Reporting Procedures in section 212.6) Investigation results will not be disclosed or discussed with anyone other than those who have a legitimate need to know. This is important in order to avoid damaging the reputations of persons suspected but subsequently found innocent of wrongful conduct and to protect the District from potential civil liability.

### **§213.5 Investigation Authority**

Members of the District Financial Committee will have free and unrestricted access to all District records and premises and authority to examine, copy, and/or remove all or any portion of the contents of files, desks, cabinets, and other storage facilities on the premises without the prior knowledge or consent of any individual who may use or have custody of any such items or facilities when it is within the scope of their investigations.

#### ALAMEDA COUNTY MOSQUITO ABATEMENT DISTRICT PUBLIC HEALTH EMERGENCY FUND

##### **Purpose of Fund:**

The purpose of the Public Health Emergency Fund is to mitigate the financial impact of unusually high levels of vector-borne disease activity or prevent a future threat to public health from a newly detected invasive mosquito species. The primary role of the District is to prevent and manage threats to public health as it relates to vectors and vector-borne diseases. Due to a wide range of dynamic biological and environmental factors, the abundance and disease levels of vectors and vector borne disease can vary from year to year. In addition, three new species of mosquitoes have entered California in recent years, and have brought with them the potential for the transmission of human disease not previously endemic to California. In either case, an increased threat to public health is possible, and the District has the duty to respond according to its Integrated Pest Management program and to guidance from the California Department of Public Health as stated in the "Invasive Aedes Response Plan in California" and the "California Mosquito-Borne Virus Response Plan".

##### **Policy:**

In order to achieve the objectives of this policy the Board of Trustees shall adhere to the following guidelines:

1. This fund shall be known as the "Public Health Emergency Fund."
2. The Public Health Emergency Fund shall be designated as a **committed** fund.
3. These funds will be used to replenish operating cash flow in the general fund should circumstances cause the District to incur greater than normal expenses to prevent or manage an imminent threat to public health from vectors of vector-borne disease.
4. Expenditure of Public Health Emergency Funds must be authorized by the Board of Trustees at a publicly noticed meeting
5. Expenditures from this designated fund which are subsequently recovered, either partially or fully, from State sources, shall be utilized solely for the purpose of refunding the Public Health Emergency Fund.
6. Investment earnings from the Public Health Emergency Fund may be credited to the District's General Fund.

## **Chapter 200. FINANCIAL POLICIES**

7. The Public Health Emergency Fund may be invested in financial institutions and instruments which maintain the highest level of liquidity, such as checking, savings, and LAIF.
8. Annual replenishment will vary, depending upon other designation requirements and current year expense requirements
9. This policy shall be reviewed on an annual basis for long-term adequacy and use restriction.

### **Target Fund Level:**

The target balance of this fund is \$500,000. This target is based on an estimate of likely operational needs should the most likely public health threat scenario become reality. This target balance will be reviewed annually and adjusted as needed to remain current.

#### ALAMEDA COUNTY MOSQUITO ABATEMENT DISTRICT WORKING CAPITAL FUND

##### **Fund Purpose:**

The Working Capital Fund is necessary because the District receives the majority of its funding from the property taxes and a benefit assessment collected by the Alameda County Treasurer/Controller. These revenues are not transmitted to the District until December, six months after the beginning of the fiscal year. Therefore, it is imperative that the District have funds available to cover general operating costs from the beginning of the fiscal year (July 1) to the time that revenues are received in December. Mosquitoes develop in Alameda County throughout the year, and in the absence of working capital would inhibit the District's ability to provide service to the residents of Alameda County. This fund will preserve District's credit worthiness, ensure adequate financial resources are available for timely payment of District obligations, and provide liquidity throughout the fiscal year.

##### **Policy:**

In order to achieve the objectives of this policy the Board of Trustees shall adhere to the following guidelines:

1. The fund shall be known as the "Working Capital Fund."
2. The Working Capital Fund shall be designated as an **assigned** reserve fund.
3. The District Manager is authorized to approve the expenditure of Working Capital Funds, without prior approval of the Board of Trustees, in response to day-to-day cash flow requirements.
4. The Working Capital Fund will be held in the District's account in the County Treasury.
5. Investment earnings from the Working Fund may be credited to the District's General Fund.
6. Annual replenishment will vary, depending upon other designation requirements and current year expense requirements
7. This policy shall be reviewed on an annual basis for long-term adequacy and use restrictions.

##### **Target Fund Level:**

The target fund level for the Working Capital Fund is to maintain a minimum Capital Funds for Operations equal to 60% of discretionary General Fund revenues, as of July 1st of each fiscal year. This target fund level was established based upon the following general guidelines:

1. The District shall maintain a balance in the General Fund equal to approximately 60% budgeted expenditures for the fiscal year.

## **Chapter 200. FINANCIAL POLICIES**

2. For the purpose of this policy, budgeted expenditures shall include all expenditures associated with the following:
  - a. Salaries and Employee Benefits
  - b. Services and Supplies

## **Chapter 300. SALARIES AND WORKING CONDITIONS OF EMPLOYEES**

POLICIES SET FORTH IN THIS HANDBOOK REFLECT THE REQUIREMENTS OF CURRENT EMPLOYMENT LAWS. THESE LAWS AND THE ASSOCIATED REGULATORY REQUIREMENTS ARE SUBJECT TO CHANGE. CHANGES IN LAW MAY NOT BE REFLECTED IN THE STAFF POLICIES, BUT WILL BE IN FULL EFFECT. IF THERE IS A CONFLICT BETWEEN THE STAFF POLICY AND THE LEGAL REQUIREMENTS, THE LEGAL REQUIREMENTS SHALL CONTROL.

**§301.2 (iii)** For each salary range the first step is considered the entrance rate and the top step the maximum, unless the District Manager finds merit in a candidate's related work experience and training. Ordinarily new employees would be started at the minimum rate and progress to the second step after six months satisfactory service. The third step is achieved after an additional six months of satisfactory service. Each remaining step is reached after one year of satisfactory service at the preceding step. This provision applies to all represented employees.

**§303.6 (i)** The District will provide up to twelve (12) weeks of Family and Medical Care Leave in a twelve (12) month period for eligible employees as required by State and Federal Law. The following provisions set forth certain of the rights and obligations with respect to such leave. Rights and obligations which are not specifically set forth below are set forth in the Department of Labor regulations implementing the Federal Family and Medical Leave Act of 1993 (“FMLA”), and the regulations of the California Family Rights Act of 1993 (“CFRA”), as amended.

**§303.6 (ii)** District employees who have been employed by the District for twelve (12) months and have worked one thousand two hundred and fifty (1,250) hours or more in the twelve (12) months immediately preceding the request for leave are eligible to take Family and Medical Care Leave.

**§303.6 (iii)** Leave is only permitted for the following reasons:

- a) The birth of a child or to care for a newborn of an employee;
- b) The placement of a child with an employee in connection with the adoption or foster care of a child;
- c) Leave to care for an immediate family member as defined in §303.15 of these Policies, who has a serious health condition;
- d) Leave because of a serious health condition that makes the employee unable to perform the functions of his/her position;
- e) Leave for a “qualifying exigency” arising out of the fact that an employee’s immediate family member is on active duty or call to active duty status in the regular Armed Forces, National Guard or Reserves who is deployed by the military to a foreign country.
- f) Leave to care for an immediate family member of the service member or veteran within five years of discharge from the military of the United States Armed Forces, National Guard or Reserves who has a serious injury or illness incurred in the line of duty while on active military duty.

**§303.6 (iv)** An eligible employee may be granted up to a total of twelve (12) work weeks of Family and Medical Care Leave in a rolling twelve (12) month period. This rolling twelve month period will be measured forward from the date an employee uses any Family and Medical Care Leave. In the case of a serious health condition of an employee or an employee’s family member, adequate medical certification is required.

## Chapter 300. SALARIES AND WORKING CONDITIONS OF EMPLOYEES

- a) An eligible employee may be granted up to a total of twenty six (26) work weeks of Military Caregiver Leave during a single 12 month period to care for a covered service member or veteran within five years of discharge from the military who has a serious injury or illness incurred in the line of duty on active duty for which the service member is undergoing medical treatment, recuperation, or therapy; or otherwise in an outpatient status; or otherwise on the temporary disability retired list. The single 12-month period shall be measured forward from the date an employee's first FMLA leave to care for the covered service member begins. During the single 12-month period, an eligible employee's FMLA leave entitlement is limited to a combined total of 26 workweeks of FMLA leave for any qualifying reason.
- b) Where FMLA leave qualifies as both Military Caregiver Leave and care for a family member with a serious health condition, the leave will be designated as Military Caregiver Leave first.

**§303.6 (v)** If leave under this section is requested for the birth, adoption or foster care placement of a child of the employee, leave must be concluded within one year of the birth or placement of the child. In addition, the basic minimum duration of such leave is two weeks. However, an employee is entitled to leave for one of these purposes (e.g., bonding with a newborn) for at least one day, but less than two weeks duration on any two occasions.

- a) If leave is requested to care for an immediate family member or the employee him/herself with a serious health condition, there is no minimum amount of leave that must be taken. However, the employee must comply with the notice and medical certification provisions of this policy.

**§303.6 (vi)** Family and Medical Care Leave may be taken on an intermittent basis as separate blocks of time or on a reduced leave schedule due to a single qualifying event if it is medically necessary for medical treatment of a serious health condition, for recovery from treatment or recovery from a serious health condition, or in conjunction with a chronic serious health condition of the employee or a member of the employee's immediate family.

- a) The employee must provide medical certification that such leave is medically necessary. Medically necessary means there must be a medical need for the leave and that the leave can best be accomplished through an intermittent or reduced leave schedule. It may also be taken to provide care or psychological comfort to an immediate family member with a serious health condition.

## Chapter 300. SALARIES AND WORKING CONDITIONS OF EMPLOYEES

- b) Intermittent or reduced schedule leave after the birth or placement of a child for adoption or foster care may be taken only if the District agrees, unless the intermittent or reduced schedule leave is due to the mother's serious health condition or the baby's serious health condition. Intermittent leave must be taken in increments of at least one-half hour.
- c) An employee taking intermittent leave or leave on a reduced schedule for planned medical treatment or recovery from a serious health condition, or an employee permitted to take intermittent leave or reduced schedule leave for the birth or placement of a child, may be temporarily transferred to an available alternative position for which the employee qualifies which better accommodates recurring periods of leave than the employee's regular position. Although the alternative position may or may not have equivalent duties, the employee will receive equivalent pay and benefits during the time he/she works in the alternative position.
- d) Leave due to a qualifying exigency may be taken on an intermittent or reduced schedule basis.

**§303.6 (vii)** Employees on approved Family and Medical Care Leave will be required to exhaust accumulated leave balances before being placed on unpaid leave, as provided below:

- a) If the need for leave is in conjunction with employee's own serious health condition, the employee must first exhaust accrued sick leave balances, then other leave balances including vacation, compensatory time off, and holiday time prior to moving to unpaid Family and Medical Care Leave.
- b) If the need for leave is in conjunction with the care of an immediate family member who has a serious health condition, the employee may use the limited allowance of sick leave hours and then must use other leave balances including vacation, compensatory time off, and holiday time prior to moving to unpaid Family and Medical Care Leave.
- c) If the leave is requested for a non-medical reason such as bonding after the birth of a child, the employee must exhaust accrued vacation and other leave balances exclusive of sick leave prior to moving to unpaid Family and Medical Care Leave. (Compensatory time may be voluntarily elected.)

## Chapter 300. SALARIES AND WORKING CONDITIONS OF EMPLOYEES

- d) An employee on leave which is qualifying under the California Family Rights Act (CFRA) and who is receiving either disability or paid family leave benefits through the State of California is not required to use leave accruals prior to moving to unpaid Family and Medical Care leave.

**§303.6 (viii)** If an employee takes a leave for any reason that is FMLA/CFRA qualifying, the District may designate the requested leave as running concurrently with the employee's 12-week FMLA/CFRA leave entitlement. Upon District designation of leave as FMLA/CFRA qualifying, written notice of such.

**§303.6 (ix)** The District will continue to pay the District's portion of the cost of "health insurance" for an employee while he/she is on an approved Family and Medical Care Leave to the same extent it would if the employee were working, regardless of pay status.

- a) "Health Insurance" is defined as medical, vision, and dental insurance.
- b) The employee must continue to pay his/her employee contribution to health insurance either through payroll deduction while using leave balances, or by direct payment while on unpaid leave.
- c) Coverage on a particular plan may be dropped if the employee is more than 30 days late in making a premium payment. However, the employee shall receive a notice at least 15 days before coverage is to cease, advising that he/she will be dropped if the premium payment is not paid by a certain date.
- d) Contribution amounts for all employees are subject to any change if changes in rates occur while the employee is on leave.
- e) If an employee fails to return to work after his/her leave entitlement has been exhausted or expires, the District shall have the right to recover its share of health insurance premiums for the entire leave period, unless the employee does not return because of the continuation, recurrence, or onset of a serious health condition of the employee or his/her family member which would entitle the employee to leave, or because of circumstances beyond the employee's control.

**§303.6 (x)** An employee disabled by pregnancy is eligible for up to four (4) months of leave for medical disability related to pregnancy under State law. This leave may be in addition to up to twelve (12) weeks of Family and Medical Care Leave. Family and

Medical Care Leave available under the California Family Rights Act will not run concurrent with pregnancy disability leave.

- a) The total combined duration of District contribution toward health insurance available during unpaid leaves due to any combination of pregnancy disability, the employee's serious health condition, and family care purposes under this section will not exceed twenty-nine and one-third (29.33) weeks in a twelve (12)-month period.

**§303.6 (xi)** Although the District recognizes that emergencies arise which may require an employee to request immediate leave, the employee is required to give as much notice as possible of his/her need for leave.

- a) Except for qualifying exigency leave, if leave is foreseeable, at least 30 days written notice is required. If an employee knows that he/she will need leave in the future, but does not know the exact date(s) (e.g., for the birth of a child or to take care of a newborn), the employee is to inform his/her supervisor as soon as possible that such leave will be needed; this notice may be given orally.
- b) In the case of a qualifying exigency, the employee shall provide the District with a copy of the covered service member's active duty orders or other documentation issued by the military which indicated that the service member is on, or has been called to, active duty for deployment by the military to a foreign country and the dates of the active duty service. In addition the employee will provide documentation that the leave is for a qualifying exigency listed in this policy and the anticipation length of the leave.

**§303.6 (xii)** Following receipt of a Request for Medical Leave of Absence Form the District shall, within five (5) business days, send the employee a Notice of Eligibility and Rights and Responsibilities. At that time the employee will be given at least 15 calendar days to return a completed Certification of Health Care Provider, either for the employee's own serious health condition or for the serious health condition of an immediate family member to the District.

**§303.6 (xiii)** An employee requesting Family and Medical Care Leave due to his or her own the serious health condition, or the serious health condition of a family member shall provide certification from the health care provider treating the individual.

## **Chapter 300. SALARIES AND WORKING CONDITIONS OF EMPLOYEES**

- a) When a leave is requested for the serious health condition of a family member, the certification must include the date, if known, on which the serious health condition commenced; the probable duration of the condition; an estimate of the time the health care provider believes the employee needs to care for the individual; and a statement that the serious health condition warrants the participation of the employee to provide care during treatment.
- b) When a leave is requested for the serious health condition of the employee, the certification shall include the information included above, and a statement that, due to the serious health condition, the employee is unable to perform any one or more of the essential functions of the position.
- c) If the District has a good faith, objective reason to doubt the validity of a certification provided by the employee for his or her own serious health condition, the District may require a medical opinion of a second health care provider chosen and paid for by the District. If the second opinion is different from the first, the District may require the opinion of a third provider jointly approved the District and the employee, but paid for by the District. The opinion of the third provider will be binding. An employee may request a copy of the health care provider's opinions when there is a second or third medical opinion sought.
- d) Medical certification for a Military Caregiver Leave shall be from a United States Department of Defense, Department of Veteran's Affairs, or other authorized medical provider. It shall indicate:
  - 1) whether the service member has incurred a serious injury or illness;
  - 2) whether the injury or illness renders the service member medically unable to perform the duties of the member's position;
  - 3) whether the injury or illness was incurred in the line of duty on active duty;
  - 4) whether the service member is undergoing medical treatment, recuperation, or therapy, or is otherwise on outpatient status, or is otherwise on the temporary disability retired list;
  - 5) the probable duration of the injury or illness;

## Chapter 300. SALARIES AND WORKING CONDITIONS OF EMPLOYEES

- 6) the frequency and duration of leave the family member requesting leave will require; and
  - 7) the family relationship of the eligible employee to the covered service member.
- e) When an employee's leave is foreseeable and at least 30 days' notice has been provided, if medical certification is requested, the employee must provide it before the leave begins. When this is not possible, the employee must provide the requested certification to the District within the timeframe requested by the District (which must allow at least 15 calendar days after the employer's request), unless it is not practicable under the particular circumstances to do so despite the employee's diligent, good faith efforts.
  - f) If an employee provides an incomplete medical certification the employee will be given a reasonable opportunity to cure any such deficiency. However, if an employee fails to provide a medical certification within the time frame established by this policy, the District may delay the taking of Family and Medical Care Leave until the required certification is provided.
  - g) Recertification of the serious health condition may be requested upon the expiration of the time period the health care provider originally estimated. Re-certification from a health care provider may only be requested after the first certification has expired.
  - h) Upon receipt of the Certification of Health Care Provider, the District will send the employee a Family and Medical Care Leave Designation memo, indicating if the leave is approved, not approved or if additional information is needed to make a determination. If the leave is approved, the Family and Medical Care Leave Designation memo will set forth any conditions of the leave which may exist beyond what are provided in the Notice of Eligibility and Rights and Responsibilities.

**§303.6 (xiv)** An employee granted Family and Medical Care Leave in accordance with this policy shall, upon returning to work, generally be reinstated to the position of employment held before the leave commenced, or, if such a position is not available, to an equivalent position with equivalent employment benefits, pay, and terms and conditions of employment.

## Chapter 300. SALARIES AND WORKING CONDITIONS OF EMPLOYEES

- a) Employees have no greater rights to reinstatement, benefits, and conditions of employment than if the employee had been continuously employed during the leave period.

**§303.6 (xv)** It is against District policy and State and Federal law to discriminate against any individual because that individual has exercised his or her right to Family and Medical Care Leave or leave taken under the California Family Rights Act.

**§303.6 (xvi)** An employee who fraudulently obtains or uses leave under the California Family Rights Act is not protected by job restoration or maintenance of health benefit provisions of that Act.

### §303.7 Pregnancy Disability Leave

**§303.7(i)** The District will provide up to four months, or seventeen and one-half (17.5) weeks of Pregnancy Disability Leave to eligible employees as required by State Law.

**§303.7(ii)** An employee who has been advised by her health care provider that she is disabled due to pregnancy or a pregnancy-related condition, and who has provided timely notice of this determination to the District, is entitled to Pregnancy Disability Leave. There is no minimum service requirement for eligibility.

**§303.7(iii)** Pregnancy Disability Leave is available when a woman is actually disabled by her pregnancy, childbirth, or a related medical condition. The reasons for leave include:

- a) time off needed for prenatal care,
- b) severe morning sickness,
- c) doctor-ordered bed rest,
- d) childbirth, recovery from childbirth, and any related medical condition.
- e) a woman does not have to be completely incapacitated or confined to her bed to qualify as being disabled by pregnancy. However, as a general rule, a woman must be, in the opinion of her physician, unable to perform one or more essential functions of her job without undue risk to herself or to other persons or without undue risk to successful completion of her pregnancy.

## Chapter 300. SALARIES AND WORKING CONDITIONS OF EMPLOYEES

**§303.7(iv)** The duration of Pregnancy Disability Leave limited to four months (17.5 weeks) during the period the employee is disabled by pregnancy or a pregnancy-related condition.

**§303.7(v)** Pregnancy Disability Leave may be accounted for in increments of no greater than one hour, or the increment utilized to account for use of other forms of leave (if the same is less than one hour).

**§303.7(vi)** An employee disabled by pregnancy is eligible for intermittent or reduced schedule leave if recommended by her treating physician.

- a) If intermittent leave is medically advisable, it may be necessary to temporarily transfer the employee to an available alternative position with an equivalent rate of pay and benefits.
- b) The employee must be qualified for the available alternative position.
- c) The equivalent position must better accommodate recurring periods of leave than the employee's regular job.
- d) If there is no available alternative position, the District may consider altering the employee's existing position on a temporary basis to accommodate intermittent leave or reduced schedule.

**§303.7(vii)** The District will consider temporary reasonable accommodations which are determined to be medically advisable by the employee's health care provider, and reasonable by the District. Temporary accommodations may include:

- a) Additional leave after the employee has exhausted her right to four months of Pregnancy Disability Leave;
- b) Transfer to a less strenuous or hazardous position if the employee's health care provider states that it is medically advisable and the employee is qualified for the position;
- c) Creation of a temporary light-duty assignment, or modification of current job on a temporary basis;
- d) Modifying the work schedule on a temporary basis;
- e) Allowing more frequent restroom breaks.

**§303.7(viii)** An employee seeking a temporary accommodation in conjunction with pregnancy or a pregnancy-related condition shall provide notice of the need for such an

## Invasive Aedes Mosquito Response Plan

**August 2016**

### Overview

The purpose of this document is to serve as a guide for the Alameda County Mosquito Abatement District (ACMAD) in responding to invasive container breeding mosquitoes, *Aedes aegypti* (yellow fever mosquito) and *Aedes albopictus* (tiger mosquito), that have the potential to breed and become established in Alameda County (County). These two species of mosquito are known to transmit dengue (DENV), chikungunya (CHIKV), yellow fever (YFV), and Zika (ZIKV) viruses to people. Plans are needed to survey the County for invasive *Aedes*, confirm the identification of a mosquito specimen as an invasive *Aedes*, and act to limit the dispersal of invasive *Aedes* in the County. Because the breeding, dispersion, and control of invasive *Aedes* mosquitoes differ substantially from that of mosquito species which transmit West Nile virus (WNV), a distinct response plan is needed for invasive *Aedes*. The ACMAD Invasive *Aedes* Response Plan that is outlined herein was developed using the California Department of Public Health (CDPH) "Guidance for Surveillance of and Response to Invasive *Aedes* Mosquitoes and Locally Acquired Exotic Mosquito-borne Infections Transmitted by These Mosquitoes in California" published in June 2014 and revised March 2016 and response plans published by vector control entities.

### Annual Training

Training should focus on all known invasive mosquito species currently present in California. Upon completion of training, Operations and Lab Staff should be able to:

1. Identify all life stages of invasive mosquito species.
2. Have knowledge of the biology and ecology of the invasive mosquito species.
3. Be current on latest surveillance and control methods being used for invasive mosquitoes in California.

## Pre-Detection of Invasive *Aedes* Mosquito Response Plan

1. ***Aedes* Surveillance.** Ovicups paired with autocidal gravid oviposition traps (AGO) are placed at sites where invasive *Aedes* mosquitoes may be introduced into the County (e.g. cemeteries, nurseries, US Customs inspection sites).
2. **Service Requests.** If a service request indicates daytime biting mosquitoes, and a native *Aedes* mosquito sample is not provided, Operations Staff will inspect the site for adult or breeding invasive *Aedes*.
3. **Human Case Surveillance.** When local public health agencies notify ACMAD of suspected case of invasive mosquito-vectored disease, Lab Staff should place invasive *Aedes* traps near to where the case resided while they were potentially viremic.
4. **Public Outreach.** The goal is to educate the community on the differences between invasive *Aedes* and our native mosquitoes. The focus will be on prevention and detection by encouraging residents to eliminate/reduce potential invasive *Aedes* sources and to report daytime biting mosquitoes to ACMAD.

## Plan for Confirmation of an Invasive *Aedes* Mosquito in the County

1. **Mosquito Specimen Documentation.** Operations or Lab Staff that retrieve mosquito specimens suspected to be invasive *Aedes* will document the location at which the specimen was collected (address or GPS coordinates are required), the date and time of collection, and the name of the Staff that collected the specimen.
2. **Mosquito Sample Transport.** All suspected invasive *Aedes* specimens will be transported to the ACMAD Lab for identification. Suspected adult invasive mosquitoes that are collected by Staff should be immediately killed or contained (without damaging the specimen) to prevent transmission of arboviruses to Staff and placed into a container for transport to the ACMAD Lab for identification. Invasive mosquito larvae specimens should be collected in a specimen container using the water in which the larvae were found, and efforts made to keep the specimens alive. Suspected invasive *Aedes* eggs should be collected in a manner that does not damage or desiccate the egg, preferably by placing the container that contains the eggs into a moistened plastic bag for transport.
3. **Identification of Suspected Invasive *Aedes*.** The ACMAD Laboratory Director will identify the specimen using taxonomic keys and verified photographs of invasive *Aedes* and local mosquito species. If the specimen keys to an invasive *Aedes*, a second ACMAD Staff member having extensive expertise in identifying mosquitoes will confirm the identification (e.g. Biological or Environmental Specialist, or Operations Supervisor).
4. **External Confirmation of Invasive *Aedes*.** If the Laboratory Director and second ACMAD Staff member concur that the specimen is likely invasive *Aedes*, external experts will be consulted for confirmation. All specimens will be photographed before being transported for external confirmation. Eggs will be sent to the Manager at Davis Arbovirus Research and Training (DART). Larvae will be reared to adult and identified. For adults, the Supervising Public Health Biologist and Senior Public Health Biologist for Alameda County at CDPH will be advised of the identification, and subsequently, the specimen preserved for genotype analysis (currently by the Yale University DNA Analysis Facility).

## Post-Detection of Confirmed Invasive *Aedes* Mosquito Response Plan

1. **Confirmed Invasive *Aedes*.** If CDPH or DART confirms the identification of the specimen as an invasive *Aedes*, the Public Health Committee of the ACMAD Board of Trustees will be notified of the identification. The Mosquito Abatement and Vector Control agencies that are adjacent to ACMAD will be contacted directly by Office Staff to notify of the identification. Next, a press release will be distributed to the media and local agencies to inform the public of the detection.
2. **Operations Control Response.** The broad goal of the Operations Response is to limit the intensity and geographic distribution of invasive *Aedes*. All equipment that enter an area with invasive *Aedes* will be inspected and sanitized. Collected mosquito specimens will be contained before leaving that area to prevent the spread of mosquitoes.
  - a. **Catch Basin (CB) Treatment.** CBs in and around the area having invasive *Aedes* will be treated to reduce the abundance of all mosquitoes in the area.
  - b. **Outside of the Invasive *Aedes* Response Area.** Vector Biologists (VB) and Mosquito Control Technicians (MCT) will continue treating mosquito breeding sources and responding to service requests by County residents, although potentially at reduced intervals to permit increased staffing in the Invasive *Aedes* Response Area.
  - c. **Inspection and Treatment Inside Invasive *Aedes* Response Area.** Operations Staff will work in groups of two, which will include at least one VB or MCT. Each group is an Operations *Aedes* Response Team (OART) that will inspect and sanitize properties within the Response Area. Non-*Aedes* breeding sources will be treated by OART within the Response Area to reduce overall mosquito abundance. OART may provide Home Invasive *Aedes* Surveillance Kits to some residents within the Response Area, and provide instructions on trap placement and the return of specimens to the ACMAD Lab for identification. Teams will encourage the voluntary removal of containers that may contain invasive *Aedes*, and return these to the ACMAD Lab for identification and external confirmation, if needed. If OART are unable to gain permission to enter a property for inspection or treatment, a twenty-four hour notice to enter the property will be affixed to the entry door(s) of the structure on the property.
3. **Laboratory Surveillance Response.** The broad goal of the Lab Response is to quantify the intensity and geographic distribution of invasive *Aedes* so that Operations can focus control efforts where they are most needed. Lab Staff will also continue non-*Aedes* mosquito abundance and West Nile virus surveillance throughout the County. As with Operations, all equipment that enter the Response Area will be inspected and sanitized, and collected mosquito specimens contained before leaving that area to prevent the spread of mosquitoes.
  - a. **Surveillance Overview.** Two Lab Staff, which will include at least the Laboratory Director or Biological Specialist, will form a Lab *Aedes* Response Team (LART) that will conduct surveillance for invasive *Aedes*. At sites where invasive *Aedes* surveillance is conducted, LART will inspect and sanitize properties and treat sources of breeding mosquitoes. LART will employ a range of specialized invasive *Aedes* (e.g. AGO, ovicup, and BG-Sentinel) and standard mosquito traps (e.g. CO<sub>2</sub> and gravid traps) to quantify the relative proportion of invasive to native mosquitoes, their abundance and geographic distribution within and around the Response Area. Lab Staff will generate Invasive *Aedes* Abundance Maps for each Response Area within the County that document the location and abundance of invasive *Aedes*.

- b. **Surveillance in a Newly-Identified Invasive *Aedes* Response Area.** Collected specimens that are likely to be invasive *Aedes* will be identified to species by the ACMAD Lab and confirmed using external experts, as described previously herein.
  - c. **Surveillance in an Ongoing Invasive *Aedes* Response Area.** Specimens that are collected within the Response Area and likely to be invasive *Aedes* will be periodically identified by Lab Staff to species. Specimens collected outside of the Response Area will be identified to species, as described previously herein.
  - d. **Surveillance for Locally-Acquired Human Case of a Disease Transmitted by Invasive *Aedes*.** ACMAD will activate the Laboratory Surveillance Response.
4. **Office Response.** The goal of the Office Response is to inform County residents and relevant entities of the Invasive *Aedes* Response Area, coordinate the Operations and Lab Responses, and engage in public outreach that will encourage County-wide efforts to suppress invasive *Aedes* mosquitoes.
- a. **Service Request Script for Invasive *Aedes*.** For service request calls, the Office Staff will employ a script and report form that is designed to identify calls with a higher likelihood of being initiated by invasive *Aedes*.
  - b. **Coordination of Operations and Lab Responses.** Inspection Maps will be generated by Office Staff for guiding Operations Staff to sites in and around the Response Area that have been sanitized, need inspection, or have twenty-four hour entry notices placed at the property. Office Staff will integrate Inspection and Invasive *Aedes* Abundance Maps to be used for coordinating Operations and Lab Staff efforts. Morning planning and daily wrap-up meetings of the ACMAD Staff will be coordinated by Office Staff.
  - c. **Public Outreach Response.** The goal of the Public Outreach Response is to increase the awareness of invasive *Aedes* in the community in order to encourage residents to report daytime biting mosquitoes to ACMAD, and to inspect and sanitize properties in the County so that the spread of invasive *Aedes* can be curtailed. Outreach to the elected representatives and city/community officials in the affected areas are also included in this response.
  - d. **Community Emergency Response Teams (CERT).** CERT within and adjacent to the Response Area may be activated to aid ACMAD Staff in distributing information related to the invasive *Aedes* response.

## 1. OPERATIONS

### A. Narrative

#### OPERATIONS REPORT JULY 2016

The prime focus of field operations during the month of July was inspections and treatments for *Culex* mosquitoes. A large amount of this effort was in response to West Nile virus positive birds and mosquitoes. Seven WNV positive birds were collected in three distinct regions of Alameda County and one of the regions also produced WNV positive mosquitoes, Fremont/ Newark. Typically, the district has seen a focus of WNV activity in one primary region of the County in a given season. It has often alternated between the Pleasanton / Livermore area and the Fremont / Newark area. This month it became clear that both of these aforementioned regions will be active. Priority was placed on inspecting and treating any potential *Culex* breeding sources in and around these collection sites. Catch basins, sumps, and storm drains were inspected and treated for *Culex pipien*. Swimming pools, fresh water marshes, and canals were inspected and treated for *Culex tarsalis*. In several locations, field staff, seasonals, and the field operations supervisor combined efforts to locate and treat any *Culex* breeding sources. This effort will continue in the months to come, until the rainy season arrives. Field operations will continue to operate accordingly while maintaining inspections and treatments for *Culex* mosquitoes as well as other mosquito species throughout the County.

Other aspects of *Culex* control that have been under way and that will continue to include inspections and treatments of unmaintained swimming pools throughout the County, many of which were initiated via the ACMAD's aerial pool survey program. In response to this survey, field staff inspected 369 pools in the month of July. Unmaintained swimming pools are a major breeding source for *Cx. Tarsali*, and can also breed *Cx. Papiens*, and *Culiseta incidens*. As of the close of the month, the majority of the pools received from the survey have been inspected and treated as needed.

Several treatments for *Culex erythrothorax* were conducted in July. The main treatment focus for this species was at the Hayward Marsh. These were conducted by boat in the marsh with the assistance of the East Bay Regional Park District (EBRPD) staff. This marsh produced high numbers of *Cx. erythrothorax* in the last several years and had WNV positive *Cx. erythrothorax* attributed to it last season. Thus, a regular treatment schedule has been put into place for this

source until EBRPD is able to remove a significant amount of the bull rush from the marsh. Bull rush and tule are key fresh water marsh plants associated with this mosquito species.

The month of July had two high tide cycles, one at the beginning of the month, and the other at the end of the month. Several sources in four zones were treated for *Aedes dorsalis* in the month of July. As stated in last month's report, *Ae. dorsalis* is a very aggressive day-biting mosquito that can generate large numbers of service requests. Timing of inspections and treatments for this species is critical in achieving control. In many instances, field staff worked together in teams to achieve control in the limited window of time before this species goes from egg to adult. Several sources, especially in the southern part of the County, are large, and due to restrictions on use of equipment, must be treated by hand or helicopter. Team work has proven to be the only way to treat these areas effectively.

## 2. LAB

Below is a summary of the activities from the Lab for July, 2016

### Budget

- As of July 22, 2016 (1 month of 12, 8 % of the year), 1 % of the lab budget has been expended. However, this accounting does not include equipment and supply purchases made during the final week of the month. Additionally, a capital expenditure occurred to acquire an instrument for the automated isolation of nucleic acid that has been used to test birds and mosquitoes for arboviruses (e.g. West Nile virus) and will be employed for pesticide resistance studies.

### Mosquito Abundance Monitoring

- Comparison of mosquito abundance for weeks 1 – 31 during 2015 and 2016 show an ongoing and significant reduction in the average number of mosquitoes for 2016, as measured with New Jersey Light Traps (Figure 1; Two-way ANOVA  $P = 0.0010$ ). However, when only the month of July was compared for 2015 and 2016, there was no significant difference in mosquito abundance (not shown, Two-way ANOVA,  $P = 0.6539$ ). These results suggest that because mosquito abundance was higher during the early period of 2015 relative to 2016, and that as the year progressed, mosquito control efforts may have been more effective during the early months of 2016 relative to those of 2015. During July of 2016, there was no rain and 486 growing degree days (an indirect measure of mosquito reproduction; data from Weather Underground, measured using the weather station at Hayward Executive Airport). For the same period of 2015, there was minimal rainfall (0.11 inches) and 547 growing degree days (a 12 % increase over 2016). Because there was no significant difference in mosquito abundance during July of 2015 and 2016, the recorded 12 % difference in growing degree days did not appear to affect overall mosquito abundance, as measured by NJLT.
- For the month of June, 145 CDC EVS CO<sub>2</sub> traps were placed and the collected mosquitoes enumerated and identified to species (total of 2059 mosquitoes, average of 14.2 mosquitoes per trap). Although a higher number of CDC EVS CO<sub>2</sub> traps were placed during July of 2015 ( $n = 284$ ), the number of mosquitoes collected per trap was lower (8.070 mosquitoes per trap). Because the trend for June and July show increasing numbers of mosquitoes per CDC EVS CO<sub>2</sub> trap set for 2016 relative to 2015, it suggests that CDC EVS CO<sub>2</sub> traps are being placed at sites that collect higher numbers of mosquitoes. Although the trend is based solely on the analysis of two months, it suggests that the Lab may have become more efficient in identifying productive CDC EVS CO<sub>2</sub> trap placement sites. When the geospatial distribution of the abundance of our local WNV vectors (*Culex pipiens* and *Culex tarsalis*) was compared for 2014, 2015, and 2016 (Figure 2), the lowest number of mosquitoes per trap were collected in 2014, which was prior to the implementation of an updated trapping program by the Lab. Although the combined average number of *Culex pipiens* and *Culex tarsalis* per trap was higher in July 2015 relative to 2016, geospatial analysis of mosquito abundance showed foci where large numbers of mosquitoes were collected (e.g. in Fremont and Livermore) with relatively few collected elsewhere. In contrast, during July 2016, an increase in overall mosquito abundance was observed in traps throughout the County relative to both 2014 and 2015.
- *Anopheles* species of mosquito can transmit the parasites that causes malaria (e.g. *Plasmodium falciparum*). Because *Anopheles* mosquitoes were noted in several traps during July 2016, the Lab undertook a study to assess *Anopheles* abundance in the County during the current and prior six years (Figure 3). This research was spearheaded by Allen Esterly, a seasonal employee in the ACMAD Lab. The results of this study show that the abundance of

*Anopheles* mosquitoes indicate that relative to prior years, the abundance of these mosquitoes was not substantially higher in 2016. Thus, the current levels of *Anopheles* mosquitoes in the County are not likely to increase the risk of travel-related malaria cases initiating local transmission of the parasite.

- Ongoing monitoring for invasive *Aedes* species around the District headquarters and throughout Alameda County has not detected any such mosquitoes during 2016 (a total of 142 traps have been deployed throughout the County that are continuously monitored for invasive *Aedes*).

## Arbovirus Monitoring

- For the year 2016, 8 dead birds have been found to contain West Nile virus (WNV), all of which were collected during July (Figure 4, top). One WNV-positive bird was collected in the city of Alameda, three in Fremont, and three in Livermore. In contrast, during July of 2015, three WNV-positive birds were collected in Alameda County, and only in the Fremont area. Unlike 2015, when WNV-positive birds were found only west of the Berkeley-Hayward Hills, in 2016 ACMAD has expanded its enhanced mosquito control efforts to reduce WNV in the northern, western and eastern regions of the County. The number of WNV-positive birds and mosquitoes in Alameda County remains low relative to most nearby counties (Figure 4, bottom).
- For the year to date, 338 mosquito pools have been tested by the Lab for arboviruses (102 pools were tested during the month of July). During July of 2016, three mosquito pools were found to contain WNV, and the collection site for the mosquitoes in these pools was the same (near Stevenson Boulevard and Blacow Road in Fremont).
- Risk Assessment Calculators (RAC) are routinely employed by vector control agencies to assess the potential for disease transmission. For mosquito-vectored diseases such as WNV, RAC employ algorithms that include mosquito abundance, environmental temperature, and the number of mosquitoes and birds found to contain WNV. When risk for WNV transmission was assessed for the entire County, moderate to high risk for transmission was observed beginning in July for 2014, 2015, and 2016 (Figure 5, indicated by orange or red tiles, respectively). However, when WNV risk was assessed for discrete geographic regions, a different pattern emerges. For Berkeley, very low WNV risk was observed throughout the year from 2014-2016. In contrast, for Fremont, WNV risk was relatively low throughout 2014, but was moderate during the months of July and August of 2015 when WNV-positive birds and mosquitoes were detected. The risk assessment for 2016 suggests a pattern similar to that of 2015, indicating the enhance mosquito monitoring and control efforts should be planned for Fremont through the month of August, or longer if warranted. Similarly, for Livermore, moderate risk was observed in 2014 from July through to September, while low risk was observed throughout 2015, during which no WNV-positive birds or mosquitoes were detected. Because heightened risk for WNV transmission was observed to begin in Livermore during the latter part of July 2016, enhanced efforts for mosquito monitoring and control should be considered throughout August and September of this year.
- To date, no bird or mosquito have been found in Alameda County to contain St. Louis encephalitis virus or Western equine encephalitis virus.

## Research

- Pesticide resistance studies in *Culex pipiens* mosquitoes collected from the environment and a laboratory colony are underway in the Lab. Our first tests were to assess the biochemical activity of enzymes that are known to metabolize chemical pesticides (oxidase, alpha-esterase, and beta-esterase). These studies were conducted principally by Allen Esterly (a seasonal Lab employee) and two undergraduate student researchers from California State University, East Bay. These studies utilized the newly-purchased plate spectrophotometer instrument that was installed in the ACMAD Lab during July of 2016. Briefly, we collected adult mosquitoes from Val

Vista Park (Pleasanton, CA), froze them using dry ice, and selected female *Cx. pipiens* using a dissection microscope and chill table. Lab colony *Cx. pipiens* were frozen and the females selected using a dissection microscope and chill table. Five mosquitoes were paced into tubes ( $n = 10$  samples for Lab Colony and Val Vista Park samples), phosphate buffer and a glass bead added, and the sample mechanically homogenized. The samples were clarified using centrifugation, and supernatants used in the enzyme assays. The results of the study unexpectedly revealed a significantly higher quantity of protein in samples from mosquitoes collected at Val Vista Park relative to those from the lab colony (Figure 6; Unpaired t-test,  $P = 0.0002$ ). Consequently, the results of the enzyme activity assays were normalized using protein concentration. Higher oxidase and beta-esterase activity was observed for mosquitoes from the Lab Colony relative to those collected from Val Vista Park, however the difference in oxidase activity was not significant (Figure 6; Unpaired t-tests, oxidase activity:  $P = 0.0573$ ; beta-esterase activity:  $P = 0.0011$ ). There was difference in the alpha-esterase activities for mosquitoes collected from Val Vista Park and those from the Lab Colony ( $P = 0.7451$ ). The results suggest that mosquitoes from the Lab Colony have the potential for greater pesticide resistance relative to those at Val Vista Park. However, while sorting mosquitoes, we noted a higher proportion of those from Val Vista Park contained eggs, and this may explain the higher protein content observed for these samples and potentially, the higher enzyme activity. Ongoing studies will address this hypothesis, while experiments to assess of functional and genetic resistance will extend our understanding of mosquito susceptibility to chemical pesticides that are used to control mosquitoes.
